

penelope

l'œil des prétendants • the eye of the suitors

Axel Morel

the penelope project

Penelope is not a woman who despterly wait for the return of her husband, she is a queen who keeps the power and raises her country.

She has to do it cunningly because **she is under the eye of the suitors** whom violently want to steal the power, possess her and the country.

This project helps the audience to feel looking at, to place themselves in the position of Penelope.
